Genetics and Probability.

Probability. is the likelihood that an event will occur. Scientists use probability to predict the outcomes of genetic crosses. If a coin is flipped once, the chance that it will be heads is $1/2$. If it is flipped three times in a row, the probability of flipping all heads is? $1/2 \times 1/2 \times 1/2 = \underline{\hspace{2cm}}$

- Every living thing - plant or animal, microbe or human being - has a set of characteristics inherited from its parents
- Since the beginning of recorded history, people have wanted to understand how that inheritance is passed from generation to generation.
