Mower and Tractor PTO Explained. The PTO is a switch or lever found on tractors and mowers and stands for Power Take Off. This can be an electric switch or mechanical engagement that takes engine power to operate the mower deck or an implement. The PTO can run mowers by either a belt or a shaft. Typically the shaft driven PTO is for larger garden tractors and compact utility tractors.

Power takeoff (PTO) clutches are found on riding lawn mowers. These clutches exist on the bottom of the mower's engine assembly and control the flow of power to the mower's cutting blades. A failing PTO clutch will result in blades that either don't engage or will not properly disengage following use. This operation is crucial to the overall functioning of riding mowers, and thus PTO clutch repair may need to be immediately performed on riding mower models that have a failed clutch.
