The first ever narrative biography of a towering figure in British comedy Les Dawson, more than any other comedian, spoke for the phlegmatic, pessimistic British way of life. A Northern lad who climbed out of the slums thanks to an uncommonly brilliant mind, he was always the underdog, but his bark was funnier and more incisive than many comics who claimed to bite. Married twice in real life, he had a third wife in his comic worlda fictional ogre built from spare parts left by fleeing Nazis at the end of World War IIand an equally frightening mother-in-law. He was down to earth, yet given to eloquent, absurd flights of fancy. He was endlessly generous with his time, but slow to buy a round of drinks. He was a mass of contradictions. In short, he was human, he was genuine, and that's why audiences loved him. This is his story.

A compelling history of liberalism from the nineteenth century to today Despite playing a decisive role in shaping the past two hundred years of American and European politics, liberalism is no longer the dominant force it once was. In this expanded and updated edition of what has become a classic history of liberalism, Edmund Fawcett traces its ideals, successes, and failures through the lives and ideas of exemplary thinkers and politicians from the early nineteenth century to today. Significant revisionsincluding a new conclusionreflect recent changes affecting the world political order that many see as presenting new and very potent threats to the survival of liberal democracy as we know it. A richly detailed account of a vulnerable but critically important political creed, this book reminds us that to defend liberalism it is vital to understand its character and history.

What do you do with impossible dreams? When do you let them go? Niamh Shaw, scientist, engineer and performer, had always felt that something was missing in her life. Stepping away from a full-time academic career, she initially thought that it might be acting. But when in that career, she knew that she still hadn't found what she was looking for. While making her first theatre show, looking at her life choices and childhood ambitions, the realisation that she still wanted to fulfil her childhood dream to go to space, but had done nothing to achieve this goal, was painful and disappointing for her. Why had she given up on this dream? She realised that if she didn't pursue it, she would spend the rest of her life regretting that she had given up on herself. And so this 40-year-old woman from Ireland began a journey she is determined to finish. Along the way she is also inspiring people to love science as much as she does. An account of her journey so far, Niamh's story reminds us that we must fight to be the person we are destined to be.
