Managing Health Services Organizations and Systems has served the educational and professional needs of the healthcare field over four decades. The seventh edition furthers that legacy in a completely revised and reorganized text that presents a comprehensive range of the knowledge and skills needed to effectively lead and manage health services delivery. The first of three parts describes the environment in which health services are delivered. The second details tools and skills needed to manage and lead health services. The final part links the preceding chapters to Fayol's five management functions—planning, organizing, staffing, directing, and controlling—as they apply in health services. In this edition, the authors return to basics in a concise yet substantive presentation within a context of quality and performance improvement. New to this edition are chapters on healthcare economics, financial management, planning, organizing, staffing, and directing. A new section on compliance is key
