Equity Models,  
Valuation Discounted  
Cash Flow (DCF)

valuation is one of the  
fundamental models  
in value investing.

Using a DCF is one of  
the best ways to  
calculate the intrinsic  
value of a company.

Using a DCF is a  
method that analysts  
use throughout

# Where To Download

finance, and some think that using this type of valuation is far too complicated for them.

Explaining the DCF  
Valuation Model with  
a Simple Example

Discounted cash flow (DCF) is a valuation method used to estimate the value of an investment based

# Where To Download

on its expected future cash flows. DCF analysis attempts to figure out the value of an investment...

## Discounted Cash Flow (DCF) Definition

The below chart shows the sensitivity analysis of Alibaba's DCF Valuation Model. We note that the base case valuation of

## Where To Download

Alibaba is at \$78.3 per share. When WACC changes from 9% to say 11%, then the DCF valuation decreases to \$57.7. Likewise, if we change the infinite growth rates from 3% to 5%, then the fair DCF valuation becomes \$106.5
